–FOR IMMEDIATE RELEASE –

The first book for anyone interested in understanding green buildings and technology

Green Building A to Z

Understanding the Language of Green Building

Jerry Yudelson

The growth of environmental design is staggering. Jerry Yudelson continues his enormous contribution to this movement with Green Building A to Z. This book is a must-read for any emerging green building enthusiast. – Joe Van Belleghem, managing partner Windmill Development Group Ltd., founder Canada Green Building Council

Jerry Yudelson brings together the basics of green building and adds to it something for everyone, even the most experienced green champion. Green Building A to Z does not belong on your library shelf. It's an everyday tool! – Dr. Kath Williams, past president, World Green Building Council

Green Building A to Z is an important addition to the growing literature on green building. It provides an easy point of entry to learn about green buildings and green building technology, without presuming any technical or business training by the reader.

~continued~

This book shows how green building relates to some key issues, including:

- environmental site planning
- energy-efficient building design
- water conservation
- carbon dioxide emission reduction
- use of recycled and locally sourced materials, and
- healthy buildings.

From companies, colleges, developers and governments wanting to go green, to building industry professionals thinking about new green buildings or major renovations, *Green Building A to Z* is a must-read for any emerging green building enthusiast.

This outstanding resource collects very diverse and timely information into a “Green Encyclopedia” that should be on everyone’s bookshelf. Whether you are a curious newcomer or a leading-edge Green innovator, Green Building A to Z is an easy-to-read guide that brings it all together under one cover. – Rod Wille, Sr., vice-president, manager of sustainable construction, Turner Construction Company

About the Author

JERRY YUDELSON is a professional engineer and marketer who has trained more than 3,000 people in the US Green Building Council’s LEED rating system. He chaired the steering committee for the world’s largest green building conference for four years. The founder of a national green building consulting firm, he is the author of five books on green building.
